

Mossman

Cairns Hardware has been re-branding each of their sites for several years to match their new corporate branding. By partnering long-term with an end-to-end Signage Solutions Specialist, Cairns Hardware has been able to streamline its procurement process. From design and construction drawings to manufacture and installation of rollouts, we have managed to deliver completed signages all through Far North Queensland. Engaging one trusted partner like

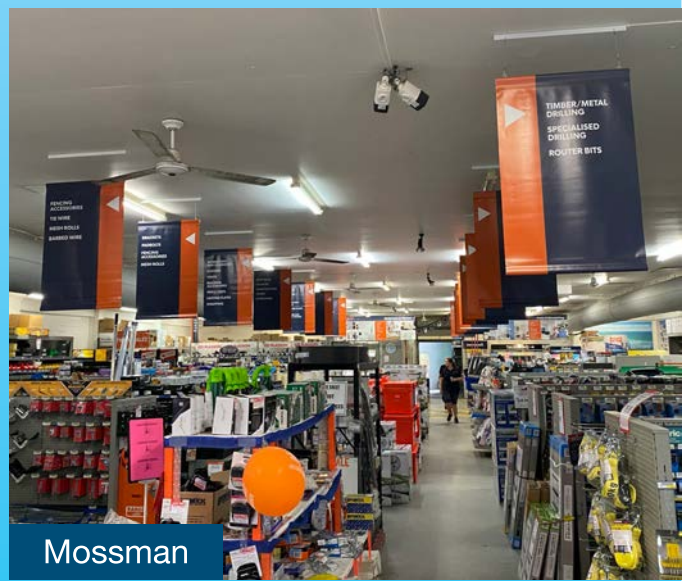

Expressway Signs, to deliver all of their signage requirements has added value to their organization and it has eliminated design rework. It has also ensured that all the concepts are 100% buildable.

The Mossman site was particularly challenging for our team, on the other hand. Due to the age of the site, there were challenges concerning asbestos in the walls and ceilings. We had to make sure that we fix all of the Signs without disturbing the asbestos, this meant no drilling or mechanical fixings. Our Design Team was able to take this challenge head-on and met all the requirements.

“The whole team at Expressway are AMAZING! Love working with you all on the signage, you make it so easy!”

Carrie Born,
Senior Marketing Coordinator
